## Introduction

## Purpose of Report

The primary purpose of this report is to document the existing demographic characteristics of the Rancho Santiago Community College District (RSCCD), and of the service areas for the two colleges within the district (see Map 1 on the following page).

## Results

In 2000, the population of the RSCCD service area was 586,003 , intermediate between Boston and Washington, D.C. ( $20^{\text {th }}$ and $21^{\text {st }}$ largest cities in the United States). The findings of this report confirm "commonly held views" about the composition and characteristics of the SAC and SCC service area populations. While the findings present few "surprises", the differences between the SAC and SCC service areas are very large. The SAC and SCC service areas typically reflect the extreme (i.e. full range) values for most demographic data items, with Orange County, and the State of California having intermediate values (reflecting the averaging of values for demographic characteristics in Orange County and California).

- While the average overall RSCCD demographic composition may be similar to Orange County and California, the RSCCD district consists of two distinct service areas, neither of which is "average".

Though SAC and SCC share a basic curriculum, share history, and serve adjacent areas, they serve very different populations. Proportionately, the SAC service area had more minorities, more immigrants, more recent immigrants, lower incomes, lower educational attainment, fewer 18-64 year olds attending college, and more people with limited English language skills than Orange County or California. SCC's service area population was more affluent, better educated, primarily native English speaking, and more frequently attending college than in California or the County.

## Using this Report

## Typical readers are expected to page through the report looking at the charts and maps,

 utilizing tables for additional detail or for alternative tabulations of data. The charts and maps portray important content of an associated table, and highlight differences between SAC and SCC service areas, and more importantly, between each service area and Orange County and California.The SAC and SCC service areas typically follow city boundaries within the legally established RSCCD boundary (see Addendum, Page 2 for additional detail). The fixed-boundary service areas are statistical in nature, while students cross the service area boundaries to take classes at either campus, or come from outside the RSCCD district to take classes at SAC and/or SCC. The Glossary includes study methodology, definitions of terms used, and additional information about the Census 2000 upon which this study was based.

## Overview of SAC and SCC Service Areas

## Population Density

Santa Ana College (SAC) primarily serves a central city population with a high proportion of lower income, Spanish-speaking immigrants. The SAC service area includes the high density "core" of Orange County's population. Maps 2 and 3, pages 6 and 7, show population density per square mile for Orange County and the RSCCD service areas. Santiago Canyon College (SCC) serves a more affluent population, with areas of older housing areas and areas of relatively new suburban housing. The SCC service area includes large areas of very low population density extending eastward to the county line, including a large section of the Cleveland National Forest.

## Ethnic Composition of the SAC and SCC Service Areas

Overall, Hispanics account for $56 \%$ of the RSCCD population, followed by Whites (29\%), and Asians (11\%). The remaining race/ethnicity categories constitute $4 \%$ of the RSCCD population. (See Table 5, Page 28). The SCC service area is $\mathbf{2 7 \%}$ Hispanic, Orange County is $\mathbf{3 0 \%}$ Hispanic, and the SAC service area is $\mathbf{7 2 \%}$ Hispanic.
"Two or More Races" represents the fourth largest RSCCD ethnic population group. The "Two or More Races" group is larger than "Black", "Hawaiian and Pacific Islander", "Native American and Alaskan Native", or "Other". The non-Hispanic individuals in this category identified themselves as having a multiple race ancestry. This "blending" of the race and ethnicity groups is a recent U.S. phenomena, though historically similar blurring occurred in the U.S. for ethnic Irish, Italian, German, etc. immigrant groups. In the non-Hispanic population, $3.4 \%$ were multi-racial. In the Hispanic population, $4.8 \%$ were Hispanic (ethnic) and multi-racial. Many of the Census Tracts along the boundaries of the RSCCD district have no single majority ethnic group, and in these areas the proportion of multi-racial/multi-ethnic group individuals is higher. The blurring ethnic/race categories is well established in RSCCD, but only starting to be seen in other areas of the country.

The western area section of RSCCD is primarily Hispanic, while the northeastern/eastern section of RSCCD is primarily White. (See "Ethnic Composition - Majority Group", Map 4, Page 8). "White, Non-Hispanic" or "Hispanic" people represented over 50 percent of the population in most RSCCD Census Tracts. Most Census Tracts in the SAC service area have a majority Hispanic population, and most SCC service area Census Tracts are have a majority White population.

The Census Tracts with no majority group are highlighted. These areas represent areas where two or three groups (Hispanic, White and/or Asian) are highly represented. The "blurring" of ethnic and racial categories noted in many national level reports from the Census Bureau is clearly evident in these areas of RSCCD.

## RSCCD 2000

## Geographic Ethnic Distribution within the SAC and SCC Service Areas

Hispanics constitute the majority group in most of the SAC service area that is within the City of Santa Ana, and in the City of Orange west of the 55-Freeway. Hispanics are significantly represented in almost all RSCCD Census Tracts, with the exceptions of the rural, less developed areas in the eastern portion of the RSCCD and a few Census Tracts in Fountain Valley, Irvine and Villa Park. (See Map 5, Page 10).

Hispanics represent over $90 \%$ of the population (by Census Tract) in the central and southeastern sections of Santa Ana. Hispanics represent less than $10 \%$ of the population in one Census Tract in Fountain Valley, and in much of the Anaheim Hills area, Villa Park, and eastern sections of the City of Orange. The SCC campus is centered in the low-Hispanic portion of the eastern section of the City of Orange (less than $10 \%$ Hispanic). These $10 \%$ and $90 \%$ breakouts show areas of very high or very low Hispanic presence. See (Map 6, Page11). Though there are larger areas to the east with $10 \%-20 \%$ Hispanic, these Census Tracts have relatively few people. (See Map 7, Page 12).

Whites represent the majority population in the eastern sections of the City of Orange, City of Villa Park, and represent the majority group in most other areas of the SCC service area. Whites also form the majority group in several Census Tracts along the southern area of the SAC service area (in Costa Mesa, Irvine and Newport Beach). (See Map 8 (percentage of Census Tract population) Page 13 and Map 9 (population count), Page 14).

Asians are spread throughout the district, but are found in highest concentrations in the Garden Grove area of the SAC service area, and in the northern section of Villa Park within the SCC service area. Asians represent $27 \%$ to $43 \%$ of the population in only a few Census Tracts within the RSCCD. Asians reflect $18 \%$ to $43 \%$ of the population in all but a few Census Tracts in the area west of the Santa Ana River. See Map 10 (percentage of Census Tract population) Page 15 and Map 11 (population count) Page 16).

As noted above, the "Two or More Races" group was the fourth larges ethnic category group. The multi-race group is spread widely throughout the RSCCD, but is most pronounced in the southern section of the SAC service area and in the Anaheim Hills section of the SCC service area. See Map 12 (percentage of Census Tract population) Page 17 and Map 13 (population count) Page 18).

The four remaining ethnic(/race) groups (Black, Hawaiian \& Pacific Islander, Native American, and "Other" have small pockets of population concentration (up to $4.5 \%$ of the Census Tract population) in widely scattered areas of RSCCD. Individuals from each of these groups were living in almost all Census Tracts. As the four remaining ethnic/race groups comprise less than $5 \%$ of any Census Tract, only population count maps are presented. (See Maps 14, 15, 16 and 17, Pages 19 to 22).

## Map 5

## Map 12

## Population of Two or More Races as Percent of Total Population

 RSCCD, Orange County, California, 2000

## Section 1

## Population, Housing and Demographic Characteristics

- $81 \%$ of the SAC service area population lived in the city of Santa Ana.
- $67 \%$ of the SCC service area population lived in the city of Orange
- $80 \%$ of SAC service area residents were under 45 years of age.
- $67 \%$ of SCC service area residents were under 45 years of age.
- SCC's service area population was $49 \%$ as large as SAC's, but there were only $35 \%$ as many 18 to 29 year olds in the SCC service area as compared to the SAC service area.
- $22 \%$ of the SAC service area residents were age 18 to 29 years.
- $16 \%$ of the SCC service area residents were age 18 to 29 years.
- 130 males lived in the SAC Area per 100 females (at age 20).
- 144 males lived in the SCC Area per 100 females (at age 20).
- $72 \%$ of the SAC service area population was Hispanic.
- $59 \%$ of the SCC service area population was White.

- The average household size was 4.4 in the SAC Area.
- The average household size was 3.0 in the SCC Area.
- The average household size was 2.9 in California.
- 45,055 housing units $(51.1 \%)$ were owner occupied in the SAC service area.
- 43,994 housing units ( $69.7 \%$ ) were owner occupied in the SCC service area.
- 43,097 housing units ( $48.9 \%$ ) were renter occupied in the SAC service area.
- 19,142 housing units ( $30.3 \%$ ) were renter occupied in the SCC service area.
- $21 \%(42,076)$ of the SAC service area foreign born population entered the U.S. since 1994.
- $17 \%(7,755)$ of the SCC service area foreign born population entered the U.S. since 1994.
- $52 \%(204,349)$ of the SAC service area population were born in a foreign country.
- $24 \%(46,412)$ of the SCC service area population were born in a foreign country.

* $52 \%$ of the SAC area population was born in a foreign country.
* $21 \%$ the foreign born population in the SAC area entered the U.S. since 1994.

## Section 2

## Household and Family Relationships

- $93 \%$ of the SAC service area households were family households.
- $87 \%$ of the SCC service area households were family households.
- $75 \%$ of the SAC family household population was either a householder, spouse or child.
- $89 \%$ of the SCC family household population was either a householder, spouse or child.
- $38 \%$ of SAC area males 15 years and over had never been married.
- $29 \%$ of SCC area males 15 years and over had never been married.
- 30\% of SAC area females 15 years and over had never been married.
- $22 \%$ of SCC area females 15 years and over had never been married.
- There were 137 SAC area never married males age 15 and over for every 100 never married females age 15 and over.
- There were 126 SCC area never married males age 15 and over for every 100 never married females 15 and over.
- $74 \%$ of SAC married males and $78 \%$ of married females live with their spouse.
- $89 \%$ of SCC married males and $90 \%$ of married females live with their spouse.
- $5 \%$ of RSCCD households include unmarried-partners.
- $15 \%$ of RSCCD households with unmarried-partners include same-sex partners.

## Chart 9 <br> Household Type by Relationship

Family Households: A family includes a householder and one or more people living in the same household who are related to the householder by birth, marriage, or adoption.
Group Quarters: Institutional (e.g. correctional institutions, nursing homes and juvenile institutions) and NonInstitutional (e.g. college dormitories, military quarters, and group homes).

Note: See Glossary for additional definitions.

## Chart 10

Family Households by Relationship

Family Households: Households with one or more people related to the "householder" by birth, marriage, or adoption.
Note: Refers to relationship to householder. See Glossary for additional definitions.

Source: SF3 U.S. Census 2000, Table PCT1

* Unmarried-partner households represent 6\% of SAC area households and $5 \%$ of the SCC area households.
* Same-sex partnerships represent $\mathbf{1 . 0 \%}$ of SAC area households and $0.6 \%$ of the SCC area households.

## Section 3

School Enrollment and Educational Attainment

## - Enrollment by those over 3 years of age:

- $31 \%$ of the SAC service area population were enrolled in public schools.
- $24 \%$ of the SCC service area population were enrolled in public schools.
- $2 \%$ of the SAC service area population were enrolled in private schools.
- $7 \%$ of the SCC service area population were enrolled in private schools.

## - Enrollment by those 18-64 years of age:

- $9.3 \%$ of the SAC service area population were enrolled as college undergraduates.
- $12.2 \%$ of the SCC service area population were enrolled as college undergraduates.
- $7.2 \%$ of SAC area males and $8.1 \%$ of females were enrolled in a public institution.
- $6.6 \%$ of SCC area males and $8.7 \%$ of females were enrolled in a public institution.
- $0.6 \%$ of SAC area males and $1.0 \%$ of females were enrolled in a private institution.
- $2.1 \%$ of SCC area males and $2.2 \%$ of females were enrolled in a private institution.

- Educational attainment by those over age 25 years of age:
- $84 \%$ of the SAC service area males and $86 \%$ of females have less than an AA-degree.
- $55 \%$ of the SCC service area males and $62 \%$ of females have less than an AA-degree.
- $17 \%$ of the SAC service area population was a high school graduate, but had not attended college ( 35,579 of 211,935 people age 25 and over).
- $18 \%$ of the SCC service area population was a high school graduate, but had not attended college ( 22,343 of 125,979 people age 25 and over).

## Section 4

Language Spoken and English Speaking Ability

- $65 \%$ of the SAC service area population spoke $\underline{\text { Spanish}}$ at home.
- $64 \%$ of the SCC service area population spoke $\underline{\text { English }}$ at home.
- $37 \%$ of the SAC service area population 18-64 years spoke English "not well" or "not at all".
- $10 \%$ of the SCC service area population 18-64 years spoke English "not well" or "not at all". (of the 18-64 year old population)
- $25 \%$ of the SAC service area population is 18-64 and spoke English "not well" or "not at all".
- $3 \%$ of the SCC service area population is 18-64 and spoke English "not well" or "not at all".
(of the entire service area population)
- $26 \%$ of the SAC service area households were "linguistically isolated". ${ }^{1}$
- $7 \%$ of the SCC service area households were "linguistically isolated".
- $42 \%$ of the SAC service area Asian language households were "linguistically isolated".
- $36 \%$ of the SAC service area Spanish language households were "linguistically isolated".
- $25 \%$ of the SCC service area Asian language households were "linguistically isolated".
- $23 \%$ of the SCC service area Spanish language households were "linguistically isolated".

1) "Linguistically Isolated": No one 14 years of age or older living in the house is either:
A) a native English speaker, or
B) a non-native English speaker that speaks English "very well".

## Section 5

Income and Poverty Status

| Income in 1999 | SAC Service Area | SCC Service Area |
| :--- | :---: | :---: |
| Median Household Income | $\$ 44,300$ | $\$ 67,400$ |
| Median Family Income | $\$ 42,900$ | $\$ 74,800$ |
| Per Capita Income | $\$ 12,744$ | $\$ 25,292$ |
| Population Below Poverty Level in 1999 |  |  |
| Under 18 years | $24 \%$ | $11 \%$ |
| 18 to 64 years | $17 \%$ | $8 \%$ |
| 65 years and over | $10 \%$ | $6 \%$ |
| Households Below 1.5 x Poverty Level |  |  |
| Family Households | $29 \%$ | $10 \%$ |
| Non-family Households | $25 \%$ | $16 \%$ |
| Population Below 2.0 x Poverty Level |  |  |
| Percent of Population | $50 \%$ | $21 \%$ |

[^2]- The ratio of the number of children under 18 years of age to the number of seniors 65 years of age and over, in poverty, was $13.6: 1$ in the SAC service area and 4.3:1 in the SCC service area.
- $23 \%$ of children under 18 years of age were in poverty in the SAC service area.
- $10 \%$ of children under 18 years of age were in poverty in the SCC service area.
- Per capita income in the SCC service area was almost double that of the SAC service area ( $\$ 25,292$ versus $\$ 12,744$ ).
- $50 \%$ of the SAC service area population was considered to be "low income" ( $<2 \mathrm{x}$ poverty).

- $21 \%$ of the SCC service area population was considered to be "low income".

[^4]
## Section 6

## Occupation, Industry of Employment and Place of Work

- $26 \%$ of the employed civilian population 16 years and over in the SAC service area were in a production, transportation or material moving occupation.
- $10 \%$ of the employed civilian population 16 years and over in the SCC service area were in a production, transportation or material moving occupation.
- $18 \%$ of the employed civilian population 16 years and over in the SAC service area were in a management, professional or related occupation.
- $42 \%$ of the employed civilian population 16 years and over in the SCC service area were in a management,
 professional or related occupation.
- $82 \%$ of SAC service area workers were employed in a private company, and not self-employed.
- $69 \%$ of SCC service area workers were employed in a private company, and not self-employed.
- Female outnumbered males when employed by a private not-for-profit company, employed by the State or local government, and when working as unpaid family workers.
- Males outnumbered females when self-employed, employed by a private company, and especially when employed by the Federal government.
- There were 100 SAC service area female Federal Government employees for every 136 males.
- There were 100 SCC service area female Federal Government employees for every 220 males.
- There were 56 SAC service area female State Government employees for every 100 males.
- There were 57 SCC service area female State Government employees for every 100 males.

Males per 100 Females Employed by Class of Worker

| Employer | SAC Service Area | SCC Service Area | California |
| :--- | :---: | :---: | :---: |
| Private Companies | 160 | 132 | 134 |
| Federal Government | 136 | 220 | 136 |
| State Government | 56 | 57 | 75 |
| Local Government | 68 | 74 | 68 |

## Section 6

## Occupation, Industry of Employment and Place of Work

Most segments of the economy continue to have more males than females employed. Exceptions include "Finance, Insurance and Real Estate", "Educational; Health and Social Services", and "Other Services in the SCC service area and Public Administration in the SAC service area.

Males per 100 Females Employed by Industry of Employment

| Employer | SAC Service Area | SCC Service Area | California |
| :--- | :---: | :---: | :---: |
| Agriculture | 297 | 416 | 360 |
| Construction | 1,701 | 616 | 91 |
| Manufacturing | 162 | 191 | 75 |
| Wholesale Trade | 257 | 209 | 68 |
| Retail Trade | 125 | 126 | 2,627 |
| Transportation \& Utilities | 278 | 284 | 290 |
| Information | 139 | 139 | 140 |
| Finance, Insurance \& R.E. | 72 | 94 | 81 |
| Professional | 201 | 134 | 137 |
| Education \& Health Ser. | 35 | 44 | 39 |
| Arts, Accommodation \& Food | 151 | 123 | 114 |
| Other Services | 115 | 88 | 100 |
| Public Administration | 78 | 126 | 118 |
| TOTAL |  |  |  |

Note: Based on Table 28.

- The largest industry of employment was manufacturing ( $24 \%$ SAC service area and $15 \%$ SCC area), followed by retail ( $10 \%$ SAC area and $11 \%$ SCC service area).
- $8 \%$ of SAC service area workers were employed outside Orange County.
- $15 \%$ of SCC service area workers were employed outside Orange County.

## Section 7

## Transportation

- $62 \%$ of SAC service area workers drove a car, truck or van to work, alone ( 91,244 of 147,489 workers age 16 and over).
- $79 \%$ of SCC service area workers drove a car, truck or van to work, alone ( 73,301 of 93,142 workers age 16 and over).

- $23 \%$ of SAC service area workers age 16 and over carpooled.
- $12 \%$ of SCC service area workers age 16 and over carpooled.
- $8 \%$ of SAC service area workers used public transportation to reach work.
- $4 \%$ of SCC service area workers used public transportation to reach work.
- $8 \%$ of SAC service area workers traveled over one hour to reach work.
- $8 \%$ of SCC service area workers traveled over one hour to reach work.

- $36 \%$ of SAC service area workers age 16 years of age and over using public transportation traveled over one hour to work.
- $38 \%$ of SCC service area workers age 16 years of age and over using public transportation traveled over one hour to work.
- $6 \%$ of SAC service area workers not using public transportation traveled over one hour to work.
- 7\% of SCC service area workers not using public transportation traveled over one hour to work.
- $53 \%$ of SAC service area workers left for work between 6:00 AM and 8:30 AM.
- $63 \%$ of SCC service area workers left for work between 6:00 AM and 8:30 AM.

[^9]Addendum

## Census 2000 Content and Scope

The primary purpose of Census 2000 of the United States is to provide the population counts that determine how seats in the U.S. House of Representatives are apportioned.

Date: April 1, 2000 (Census Day) is the reference date for Census 2000.
Geographic coverage: Census 2000 of the United States covers the 50 states and the District of Columbia.

Data content: The census used a short-form questionnaire to gather information on a limited number of basic questions. These questions on age, race, sex, Hispanic or Latino origin, and household relationship and whether the housing unit was owner- or rent-occupied were asked of all people and housing units. A long-form questionnaire was used to gather more detailed information from approximately a 1-in-6 sample. It included the following subjects:
U.S. Census 2000 Population Subjects

| Age | Language spoken at home |
| :--- | :--- |
| Ancestry | Marital status |
| Citizenship | Means of transportation to work |
| Class of worker | Occupation |
| Disability | Place of birth |
| Educational attainment | Place of work |
| Employment status | Poverty status in 1999 |
| Family type | Private vehicle occupancy |
| Foreign-born status | Race |
| Grandparents as caregivers | Residence in 1995 |
| Group quarters | School enrollment |
| Hispanic or Latino | Sex |
| Household type and relationship | Travel time to work |
| Income in 1999 | Veteran/military status |
| Industry | Work status in 1999 |
| Labor force status | Workers in family in 1999 |

## U.S. Census 2000 Housing Subjects

| Age of householder | Rent |
| :--- | :--- |
| Bedrooms | Rooms |
| Farm residence | Selected monthly owner costs |
| Heating fuel | Telephone service availability |
| Hispanic origin of householder | Tenure |
| Housing units | Units in structure |
| Kitchen facilities | Utilities in rent |
| Meals included in rent | Value of housing unit |
| Mortgage status | Vehicles available |
| Occupancy status | Year householder moved into unit |
| Plumbing facilities | Year structure built |
| Race of householder |  |

## Census Technical Facts and Study Methodology

The population of the United States was counted as of April 1, 2000. The results of this decennial census (once every ten years) are gradually being released by the Census Bureau.

Some Census data was released very quickly for Congressional redistricting, and included race and ethnicity detail for the entire population, though this " $100 \%$ count" is subject to "under count". Census questions about income, occupation, education, and other social and economic characteristics were asked of a 1 -in-6 a sample of the population (16.7\%). The Census Bureau extrapolates the sample responses to the entire population. Detailed sample data of social and economic characteristics for Orange County was released in the Fall of 2002. Census sampling errors are discussed in detail at:

## Http://www.census.gov/prod/cen2000/doc/sf3chap8.pdf

This report utilized the U.S. Census 2000 Census Tract level tabulations to compute the population characteristics for the Santa Ana College (SAC) and Santiago Canyon College (SCC) service areas within the Rancho Santiago Community College District boundaries. Within these boundaries, each Census Tract averages around 5,140 people and each Census Block averages around 130 people. The $100 \%$ count data for the RSCCD service areas included 4,530 Census Blocks. The 1-in-6 sample data included 114 Census Tracts. Of these 114 Census Tracts, eight are split between the SAC and SCC service areas, and 21 are split between RSCCD service and non-service areas, resulting in some allocation errors.

Census Tract data has been used to estimate counts for each service area. The percentage of people with a specific social or economic characteristic, living in the service areas, is assumed equal to the percentage of the Census Tract total population within the service area (from smaller area Census Block Group tabulations of $100 \%$ count data). This allocation of Census Tract population into service areas introduces a third type of error. Error occurs when the distribution of the population with a social or economic characteristic differs from the distribution of the total population. For example, Hispanics may comprise $10 \%$ of a Census Tract, but it is possible that all (or none) of the Hispanic population may actually reside within the service area portion of the Census Tract. Therefore, when comparing groups or areas, small differences and/or small numbers reported within a category should be interpreted with caution. As the size of the group declines, the potential percentage error increases. As only a small portion of the population, however, has required allocation into RSCCD service and non-service areas, this source of error is unlikely to impact comparisons between SAC and SCC service areas, or with other areas.

The contrasts between service areas shown in the charts reflect very large differences, and are not likely to be due to the three sources of error noted above.

Addendum
RSCCD 2000

## Additional U.S. Census 2000 Data for Cities and Other Geographic Areas

Tables in this report are based upon Census Bureau tables, which are referenced. These same tables can be produced on-line for cities, counties, states and the nation, as well as standard sub-areas, using drop-down menus at the Census Bureau's American Factfinder web site:

## Http://factfinder.census.gov/servlet/BasicFactsServlet

Detailed demographic tables from the United States Census 2000 are located in the "2000 Summary File 3 " link. Only a few selected tables available from the Census Bureau web site have been included in this report (see Census Scope and Content, Addenda Page 1). However, the SAC, SCC, and RSCCD service areas are not Census Bureau geographies, and reports for RSCCD service areas for other Census 2000 variables cannot be directly produced from the web site

## RSCCD Non-Census Geographic Areas

| $\boldsymbol{R S C C D}$ | Rancho Santiago Community College District within Orange <br> County, California |
| :---: | :--- |
| SAC Area | Legally defined service area for RSCCD, including most of the <br> cities of Santa Ana, Orange, and Villa Park, plus portions of <br> Garden Grove, Anaheim, Costa Mesa, Fountain Valley, Irvine, <br> Newport Beach, and Yorba Linda. The district boundaries also <br> include large areas in the unincorporated area of the County. |
| SCC Area | Santa Ana College service area within RSCCD boundaries. <br> Primarily comprised of the city of Santa Ana, with significant of <br> Garden Grove and Fountain Valley, and small portions of |
| Irvine, Newport Beach, Costa Mesa, and Anaheim (near Harbor |  |
| Boulevard). |  |

Source: RSCCD Research Department

## Glossary

## Age

Age is generally derived from date of birth information, and is based on the age of the person in complete years.

## Aggregate

The sum of the values for each of the elements in the universe. For example, aggregate household income is the sum of the income of all households in a given geographic area. Aggregates are frequently used in computing mean values (mean equals aggregate divided by universe count).

## Census Block

A subdivision of a census tract (or, prior to 2000, a block numbering area), a block is the smallest geographic unit for which the Census Bureau tabulates 100-percent data. Many blocks correspond to individual city blocks bounded by streets, but blocks -- especially in rural areas - may include many square miles and may have some boundaries that are not streets. The Census Bureau established blocks covering the entire nation for the first time in 1990. Previous censuses back to 1940 had blocks established only for part of the nation. Over 8 million blocks are identified for Census 2000.

## Census Designated Place (CDP)

A statistical entity, defined for each decennial census according to Census Bureau guidelines, comprising a densely settled concentration of population that is not within an incorporated place, but is locally identified by a name. CDPs are delineated cooperatively by state and local officials and the Census Bureau, following Census Bureau guidelines. Beginning with Census 2000 there are no size limits.

## Census Tract

A small, relatively permanent statistical subdivision of a county delineated by a local committee of census data users for the purpose of presenting data. Census tract boundaries normally follow visible features, but may follow governmental unit boundaries and other non-visible features in some instances; they always nest within counties. Designed to be relatively homogeneous units with respect to population characteristics, economic status, and living conditions at the time of establishment, census tracts average about 4,000 inhabitants. They may be split by any sub-county geographic entity.

## Central City

The largest city of a Metropolitan area (MA). Central cities are a basis for establishment of an MA. Additional cities that meet specific criteria also are identified as central cities. In a number of instances, only part of a city qualifies as central, because another part of the city extends beyond the MA boundary.

## Child

A son or a daughter by birth, a stepchild, or an adopted child of the householder, regardless of the child's age or marital status.

## Glossary (continued)

## City/Place/Unincorporated Area

Legally incorporated jurisdictions, as well as unincorporated areas established by the Census Bureau as "Census Defined Places" for the 2000 Census (e.g. "Tustin Foothills" is in the unincorporated area of Orange County and has been established as a "Census Defined Place". Unincorporated Area is the area within Orange County not legally incorporated into a city, and also not within a Census Defined Place.

## Class of Worker

All people over the age of 15 who have been employed at any time are asked to designate the type of work normally done or the work performed most regularly. Occupations and types of work are then broken down into the following 5 classes.

Private Wage and Salary Workers--Includes people who worked for wages, salary, commission, tips, pay-in-kind, or piece rates for a private-for-profit employer or a private-not-for-profit, taxexempt, or charitable organization.

Self-employed people whose business was incorporated are included with private wage and salary workers because they are paid employees of their own companies. Some tabulations present data separately for these subcategories: "For profit," "Not-for-profit," and "Own business incorporated."

Government Workers--Includes people who are employees of any local, state, or federal governmental unit, regardless of the activity of the particular agency. For some tabulations, the data are presented separately for the three levels of government.

Employees of foreign governments, the United Nations, or other formal international organizations controlled by governments should be classified as "Federal Government employee."

Self-Employed Workers-Includes people who worked for profit or fees in their own unincorporated business, profession, or trade, or who operated a farm.

Unpaid Family Workers-Includes people who worked 15 hours or more without pay in a business or on a farm operated by a relative.

Salaried/Self-Employed-In tabulations that categorize persons as either salaried or self-employed, the salaried category includes private and government wage and salary workers; self-employed includes self-employed people and unpaid family workers.

## Educational Attainment

Refers to the highest level of education completed in terms of the highest degree or the highest level of schooling completed.

## Elementary School

A school inclusive of kindergarten through either the eighth or ninth grade, or the first through either the eighth or ninth grade. It can include both elementary and intermediate or middle schools.

## Addendum <br> RSCCD 2000

## Glossary (continued)

## Employed

Employed includes all civilians 16 years old and over who were either (1) "at work" - those who did any work at all during the reference week as paid employees, worked in their own business or profession, worked on their own farm, or worked 15 hours or more as unpaid workers on a family farm or in a family business; or (2) were "with a job but not at work" - those who did not work during the reference week but had jobs or businesses from which they were temporarily absent due to illness, bad weather, industrial dispute, vacation, or other personal reasons. Excluded from the employed are people whose only activity consisted of work around the house or unpaid volunteer work for religious, charitable, and similar organizations; also excluded are people on active duty in the United States Armed Forces. The reference week is the calendar week preceding the date on which the respondents completed their questionnaires or were interviewed. This week may not be the same for all respondents.

## Employment Status Reference Week

The data on employment status and journey to work relate to the calendar week preceding the date on which the respondents completed their questionnaires or were interviewed. This week may not be the same for all respondents.

## Ethnicity

For Census 2000, American Community Survey: People who identify with the terms "Hispanic" or "Latino" are those who classify themselves in one of the specific Hispanic or Latino categories listed on the Census 2000 or ACS questionnaire-"Mexican," "Puerto Rican," or "Cuban"-as well as those who indicate that they are "other Spanish, Hispanic, or Latino." Origin can be viewed as the heritage, nationality group, lineage, or country of birth of the person or the person's parents or ancestors before their arrival in the United States. People who identify their origin as Spanish, Hispanic, or Latino may be of any race.

The Hispanic or Latino group is often tabulated as one group and presented with Race groups "Not Hispanic or Latino", i.e.:

Not Hispanic or Latino
White Alone
Black or African American Alone
American Indian and Alaska Native Alone
Asian Alone
Native Hawaiian \& Other Pacific Islander Alone
Some Other Race Alone
Two or More Races
Hispanic or Latino (of any Race)
When few are counted within the smaller racial groups, these groups are frequently combined into a single "other" category.

## Family

A group of two or more people who reside together and who are related by birth, marriage, or adoption.

## Glossary (continued)

## Family Household (Family)

A family includes a householder and one or more people living in the same household who are related to the householder by birth, marriage, or adoption. All people in a household who are related to the householder are regarded as members of his or her family. A family household may contain people not related to the householder, but those people are not included as part of the householder's family in census tabulations. Thus, the number of family households is equal to the number of families, but family households may include more members than do families. A household can contain only one family for purposes of census tabulations. Not all households contain families since a household may comprise a group of unrelated people or one person living alone.

## Family Income

Total income of all family members.

## Family Size

Refers to the number of people in a family.

## Family Type

Refers to how the members of a family are related to one another and the householder. Families may be a "Married Couple Family." "Single Parent Family," "Stepfamily," or "Subfamily."

## Female Householder, no Husband Present

A female maintaining a household with no husband of the householder present.

## Group Quarters (GQ)

The Census Bureau classifies all people not living in household as living in group quarters. There are two types of group quarters: institutional (for example, correctional facilities, nursing homes, and mental hospitals) and non-institutional (for example, college dormitories, military barracks, group homes, missions, and shelters).

## Group Quarters Population

Includes all people not living in households. This term includes those people residing in group quarters as of the date on which a particular survey was conducted. Two general categories of people in group quarters are recognized: 1) the institutionalized population which includes people under formally authorized supervised care or custody in institutions at the time of enumeration (such as correctional institutions, nursing homes, and juvenile institutions) and 2) the noninstitutionalized population which includes all people who live in group quarters other than institutions (such as college dormitories, military quarters, and group homes). The noninstitutionalized population includes all people who live in group quarters other than institutions.

## High School

Includes schools with either the ninth through the twelfth grade or the tenth through the twelfth grades.

## Glossary (continued)

## Household

A household includes all the people who occupy a housing unit as their usual place of residence.

## Household Income

Total income of all household members.

## Household Language

The language currently used by respondents at home, either "English only" or a non-English language which is used in addition to English or in place of English.

## Household Population

The total number of people living in a housing unit.

## Household Size

The total number of people living in a housing unit.

## Householder

The person, or one of the people, in whose name the home is owned, being bought, or rented. If there is no such person present, many household member 15 years old and over can serve as the householder for the purposes of the census.

Two types of householders are distinguished: a family householder and a non-family householder. A family householder is a householder living with one or more people related to him or her by birth, marriage, or adoption. The householder and all people in the household related to him are family members. A non-family householder is a householder living alone or with non-relatives only.

## Household Type and Relationship

Households are classified by type according to the sex of the householder and the presence of relatives. Examples include: married-couple family; male householder, no wife present; female householder, no husband present; spouse (husband/wife); child; and other relatives.

## Housing Unit

A house, an apartment, a mobile home or trailer, a group of rooms, or a single room occupied as separate living quarters, or if vacant, intended for occupancy as separate living quarters. Separate living quarters are those in which the occupants live separately from any other individuals in the building and which have direct access from outside the building or through a common hall. For vacant units, the criteria of separateness and direct access are applied to the intended occupants whenever possible.

## Addendum <br> RSCCD 2000

## Glossary (continued)

## Income

"Total income" is the sum of the amounts reported separately for wages, salary, commissions, bonuses, or tips; self-employment income from own non-farm or farm businesses, including proprietorships and partnerships; interest; dividends, net rental income, royalty income, or income from estates and trusts; Social Security or Railroad Retirement income; Supplemental Security Income (SSI); any public assistance or welfare payments from the state or local welfare office; retirement, survivor, or disability pensions; and any other sources of income received regularly such as Veterans' (VA) payments, unemployment compensation, child support, or alimony.

## Industry

Information on industry relates to the kind of business conducted by a person's employing organization. For employed people the data refer to the person's job during the reference week. For those who worked at two or more jobs, the data refer to the job at which the person worked the greatest number of hours. Some examples of industrial groups shown in products include agriculture, forestry, and fisheries; construction; manufacturing; wholesale or retail trade; transportation and communication; personal, professional and entertainment services; and public administration.

## Labor Force

The labor force includes all people classified in the civilian labor force, plus members of the U.S. Armed Forces (people on active duty with the United States Army, Air Force, Navy, Marine Corps, or Coast Guard). The Civilian Labor Force consists of people classified as employed or unemployed.

## Language Spoken at Home

The language currently used by respondents at home, either "English only" or a non-English language which is used in addition to English or in place of English.

## Linguistic Isolation

No household member 14 years and over speaks only English or speaks a non-English language and speaks English "very well".

## Marital Status

Adults are generally classified by marital status as being married, never married, separated, divorced or widowed.

## Mean

This measure represents an arithmetic average of a set of numbers. It is derived by diving the sum of a group of numerical items by the total number of items in that group. For example, mean family income is obtained by dividing the total of all income reported by people 15 years and over in families by the total number of families.

## Glossary (continued)

## Mean Income

Mean income is the amount obtained by dividing the total income of a particular statistical universe by the number of units in that universe. Thus, mean household income is obtained by dividing total household income by the total number of households. For the various types of income, the means are based on households having those types of income.

## Median

This measure represents the middle value (if n is odd) or the average of the two middle values (if n is even) in an ordered list of data values. The median divides the total frequency distribution into two equal parts: one-half of the cases fall below the median and one-half of the cases exceed the median.

## Median Age

This measure divides the age distribution in a stated area into two equal parts: one-half of the population falling below the median value and one-half above the median value.

## Median Income

The median income divides the income distribution into two equal groups, one having incomes above the median, and other having incomes below the median.

## Not in Labor Force

Not in labor force includes all people 16 years old and over who are not classified as members of the labor force. This category consists mainly of students, housewives, retired workers, seasonal workers interviewed in an off season who were not looking for work, institutionalized people, and people doing only incidental unpaid family work (less than 15 hours during the reference week).

## Occupation

Occupation describes the kind of work the person does on the job. For employed people, the data refer to the person's job during the reference week. For those who worked at two or more jobs, the data refer to the job at which the person worked the greatest number of hours. Some examples of occupational groups shown in this product include managerial occupations; business and financial specialists; scientists and technicians; entertainment; healthcare; food service; personal services; sales; office and administrative support; farming; maintenance and repair; and production workers.

## Occupied Housing Unit

A housing unit is classified as occupied if it is the usual place of residence of the person or group of people living in it at the time of enumeration.

## Owner-occupied Housing Unit

A housing unit is owner occupied if the owner or co-owner lives in the unit even if it is mortgaged or not fully paid for.

## Per Capita Income

Average obtained by dividing aggregate income by total population of an area.

## Glossary (continued)

## Percentage

This measure is calculated by taking the number of items in a group possessing a characteristic of interest and dividing by the total number of items in that group, and then multiplying by 100 .

## Population

All people, male and female, child and adult, living in a given geographic area.

## Population Density

Total population or number of housing units within a geographic entity (for example, United States, state, county, place) divided by the land area of that entity measured in square kilometers or square miles. Density is expressed as both "people (or housing units) per square kilometer" and "people (or housing units) per square mile" of land area.

## Poverty

Following the Office of Management and Budget's (OMB's) Directive 14, the Census Bureau uses a set of money income thresholds that vary by family size and composition to detect who is poor. If the total income for a family or unrelated individual falls below the relevant poverty threshold, then the family or unrelated individual is classified as being "below the poverty level."

## Poverty Ratio

The income of a family, household or individual divided by the income defied as the poverty level for that family, household or individual.

## Race

Race is a self-identification data item in which respondents choose the raae or races with which they most closely identify.

Some tables will show date for 7 race categories: the 6 (mutually-exclusive) major race-alone categories (White, African-American, American Indian and Alaska Native, Asian, Native Hawaiian and Other Pacific Islander, and some other race) and a 'two or more races' category. The sum of these 7 categories will add to 100 percent of the population.

## Related Children

Includes all people in a household under the age of 18, regardless of marital status, who are related to the householder. Does not include householder's spouse or foster children, regardless of age.

## Renter-occupied Housing Unit

All occupied units which are not owner occupied, whether they are rented for cash rent or occupied without payment of cash rent, are classified as renter-occupied.

## School Enrollment

Enrollment in regular school, either public or private, which includes nursery school, kindergarten, elementary school, and schooling which leads to a high school diploma or college degree.

## Glossary (continued)

Sex
An individual's gender classification - male or female.

## Sex Ratio

A measure derived by dividing the total number of males by the total number of females, and then multiplying by 100 .

Spanish/Hispanic/Latino People May be of any Race
Listed below are the 28 Hispanic or Latino categories displayed in Census 2000 tabulations: Mexican
Puerto Rican
Cuban
Dominican Republic
Central American:
Costa Rican
Guatemalan
Honduran
Nicaraguan
Panamanian
Salvadoran
Other Central American
South American:
Argentinian

Paraguayan
Peruvian
Uruguayan
Venezuelan
Other South American
Other Hispanic or Latino:
Spaniard
Spanish
Spanish-American
All other Hispanic or Latino

## Spouse

A person legally married to another person.

## Tenure

Refers to the distinction between owner-occupied and renter-occupied housing units.

## Glossary (continued)

## Unmarried Partner Household

Relationships to others living in a household are based on the designated householder (See Householder). Where two adult members of a household identify themselves as partners, they can be either married or unmarried, and either opposite sex (male householder/female partner or female householder/male partner), or same sex (male householder/male partner or female householder/female partner). For example, "unmarried same-sex partner households" consist of an unmarried householder, and a partner of the same sex. (with or without children).

## Vacant Housing Unit

A housing unit is vacant if no one is living in it at the time of enumeration, unless its occupants are only temporarily absent. Units temporarily occupied at the time of enumeration entirely by people who have a usual residence elsewhere are also classified as vacant.

## Vacancy Status

Unoccupied housing units are considered vacant. Vacancy status is determined by the terms under which the unit may be occupied, e.g., for rent, for sale, or for seasonal use only.

## Year of Entry

All people born outside the United States were asked for the year in which they came to live in the U.S. This includes: people born in Puerto Rico and U.S. Island Areas; people born abroad of a U.S. citizen parent(s); and the foreign born.
