BP 6013 Energy and Water Conservation

Reference(s):

California Code of Regulations - Chapter 4, Section 57200-57205

The Rancho Santiago Community College District's Governing Board recognizes the necessity and urgency of the reduction of energy and water usage. The administration is directed to develop ways of maintaining a constant check on consumption to reduce water and energy usage. Fossil fuels, from which nearly all the nation's energy is currently produced, are non-renewable resources which are becoming increasingly scarce and expensive. Dry years illustrate that water is not an unlimited resource in California. It is the aim of the Rancho Santiago Community College District to conserve energy and water in a manner which will serve as an example for the community. It is expected that each and every member of the District's staff will exemplify the spirit and rule of this policy while serving the District.

The Governing Board delegates authority to the Chancellor to establish administrative procedures that will direct the District's energy and water conservation efforts.

Revised: September 9, 2013 (Previously BP3508)
