Outlook Web App (a.k.a. OWA) is a full-featured, web-based email client with the look and feel of the Outlook client.

- With OWA, users can access their mailboxes from any Internet connection regardless of whether the PC is equipped with Outlook.
- OWA provides most of the same functionality found in Outlook, including the familiar, easy-to-use interface.
- OWA allows users to access their calendars, contacts, tasks and folders through a secure connection, just like they would in the office.

The following guide details how to log-in, access e-mail, and check your calendar using the Outlook Web App located at https://mail.rsccd.edu.
