

REQUEST FOR QUALIFICATIONS (RFQ) #2425-362

GEOTECHNICAL ENGINEERING CONSULTING SERVICES

Addendum No.1

Issued: August 14, 2024

The following changes, additions, deletions, or corrections shall become part of the above-mentioned RFQ:

The following are responses to questions received:

1. Question: We were previously on a pre-qualified list for Geotechnical work but had to decline some projects due to the requirement to sign a PLA. Can you confirm if a PLA will still be required for future projects?

Response: The District has a Community and Student Workforce Project Agreement (CSWPA) for bond funded construction projects. The CSWPA will apply to specialty contracts that exceed \$250K.

Note, not all projects are bond funded.

2. Question: After reviewing the scope of services, we would like a little more clarity regarding the types of Geotechnical Engineering services and reports the District is looking for. (i.e. Phase 1, Phase 2, Other related studies and reports).

Response: This is a Request for Qualifications to be added to the District's list of qualified firms primarily to provide geotechnical consulting services.

Some projects may require an Environment Site Assessment (Phase 1, 2, etc.) and this scope will be identified in the project-specific Request for Proposal (RFP).

Firms that do not provide Site Assessment services are still encouraged to submit to this RFQ.
