REQUEST FOR QUALIFICATIONS #1415-91

Solar Photovoltaic Program

Addendum #4

March 12, 2015

The following changes, additions, deletions or corrections shall become part of the Request for Qualifications for Solar Photovoltaic Program

1. **Question:** Are there multiple meters at either of the sites? If so, will a list of meters and loads be provided?

Answer: There are multiple meters at the sites and a list will be provided during the RFP phase. Please also refer to Addendums 2 and 3 for additional information.

2. **Question:** To foster an equitable and easier comparison for the district, and less complexity for bidders, will the district consider asking all bidders to bid one term and one escalator? Ex: 20yr PPA term with 0% escalator. With the understanding that the district may wish to consider a different term length or price escalation after award.

Answer: The District will address terms and escalator issues in more detail as part of the RFP process. As indicated in the RFQ, the Respondent shall address 20 and 25 year terms as part their RFQ response.

3. **Question:** We believe there may be significant additional savings benefits to RSCCD by pursuing a project structures other than RES-BCT. Will the district consider non RES-BCT interconnection scenarios if determined that a higher overall energy cost savings will be realized?

Answer: The District will consider all possible alternatives if a higher overall energy savings can be realized.

4. **Question:** Does each campus have a single SCE meter or multiple?

Answer: Refer to response to Question no. 1.

5. **Question:** Will the future parking structure at Santa Ana College be designed and built to accommodate solar? When will it be built?

Answer: The location of the future parking structure has not yet been determined, nor when it will be built. Hopefully, when it is designed and constructed it will include solar PV arrays.

6. **Question:** What is the parking lot realignment and reconstruction schedule at Santa Ana College to be sure this is all done prior to the solar carport construction?

Answer: The design of the parking lot realignment and schedule is currently under development, but it has not been finalized. The Solar PV program will develop independently from the SAC projects since a Solar PV location has not been determined.
