## Santa Ana College Distance Education: Participation, Demographics and Course Success

February 2016

Santa Ana College offers a wide range of distance education sections each semester, predominately via online delivery. As this type of learning gains in popularity, it is important to continually assess enrollments and outcomes so that we may remain current with the course variety and content needs of our community and the students we serve. This publication demonstrates the differences of online course offerings at SAC as compared to the traditional classroom delivery, including number of sections offered, student demographics, course success and retention.

### Summary of Findings

Overall, the number of sections offered in distance education in Fall 2015 increased from Fall 2013 (142 to 172; 21 percentage points). Web section offerings continue to increase since Fall 2013 (90 to 124; 38 percentage points), while the number of hybrid (combination of online with some campus visits) sections held steady at about 50 sections a semester. On average, both headcounts and enrollments in web classes increased since Fall 2013 (21% and 31% respectively); however, headcounts and enrollments for hybrid classes dropped during the same time period (1% and 3% respectively). Distance education classes are defined by delivery type (web based or hybrid); therefore, data is broken down even further to assist program staff in defining specific strategies for specific teaching delivery.

***Enrollments, Course Success, Retention***

The Distance Education Program at SAC is an offering of a variety of sections in a variety of subject areas. Therefore, it is challenging to compare one mode of teaching to another based on the grades given by one teacher, one section. Percent distributions are significantly influenced by small sample sizes and caution should be used when comparisons are made. Many classes were offered in one method of instruction and do not have comparison data.

- In most cases, distance education classes (Spring 2015 and Fall 2015) have slightly lower success for similar courses offered in traditional classrooms (62% to 68% versus 65% to 67%).
- For the first time, Fall 2015 hybrid course total success rate is slightly higher than the traditional course total success rate.
- Both web and hybrid classes have lower retention rates (76% to 83%) compared to traditional classes (80% to 84%).
- Detailed course success and retention rates (by subject/course/ticket for Spring 2015 and Fall 2015 (by semester) are included below.
