AR 3505 Emergency Response Plan

EMERGENCY RESPONSE AND EVACUATION PROCEDURES

General information about the emergency response and evacuation procedures for the District are publicized each year as part of the District’s Clery Act compliance efforts and that information is available on the District web site at www.rsccd.edu and on the employee intranet at the following link: https://intranet.rsccd.edu/Safety-Risk-Management/Emergency-Operations-Plan/Pages/default.aspx.

All members of the campus community are notified on an annual basis that they should call 9-1-1 or the District Safety and Security department of any incident on campus that involves a significant emergency or dangerous situation that may involve an immediate or ongoing threat to the health and safety of students or employees on campus. The District Safety and Security Department has the responsibility of responding to, and summoning the necessary resources, to mitigate, investigate, and document these types of incidents and to determine if the situation does in fact, pose a threat to the community. If so, federal law requires that the institution immediately notify the campus community or the appropriate segments of the community that may be affected by the situation.

The District will determine the content of the message and will use some or all of the systems described below to communicate the threat to the appropriate segments of the campus community, unless issuing a notification will, in the judgment of the first responders (including, but not limited to: District Safety and Security Department) compromise the efforts to assist a victim or to contain, respond to, or otherwise mitigate the emergency.

The District has various systems in place for communicating emergency information quickly. These methods of communication include; e-mail, text messaging, phone announcements, public address system, and social media platforms such as Facebook and Twitter. The District will post updates during a critical incident on the District web site, and via the other forms of emergency notifications. The District uses BlackBoard Connect for the issuing of emergency
messages and all staff, faculty and currently enrolled students are automatically included in any emergency messages.

The District’s Director Communications and Publications, will be responsible for the dissemination of emergency information to the larger community through press releases, web site updates, and social media updates.

TESTING EMERGENCY RESPONSE AND EVACUATION PROCEDURES

An evacuation drill is coordinated by the District Safety and Security Department at least twice a year for all facilities on campus. These drills are scheduled to take place in the Fall and Spring semesters. Students and staff learn the locations of the emergency exits in the buildings and are provided guidance about the direction they should travel when exiting each facility for a short-term building evacuation. Each campus has pre-designated locations for evacuation and publishes these on their website and in other emergency plans. These locations can be affected by time of day, location of the building being evacuated, and other factors such as the location and nature of the threat. In both cases, the District Safety and Security Department and District staff on the scene will communicate information to students regarding the developing situation or any evacuation status changes.

Evacuation drills are monitored by the District Safety and Security Department and District administration to evaluate egress and behavioral patterns. Reports are prepared by participating departments which identify deficient equipment so that repairs can be made immediately. Recommendations for improvements are also submitted to the appropriate departments and offices for consideration.

PURPOSE

The Emergency Response Plan is the District’s planned response to all hazards on or affecting the campus or surrounding community. The plan will be activated by the District Chancellor or his/her delegated representative. The emergency response plan details actions and responsibilities for all employees of the District including those on the Emergency Operations Center (EOC) staff.

RESPONSIBILITY

Government Code Sections 3100-3101 state that all employees of the District are declared Disaster Service Workers during emergencies, subject to such activities as may be assigned to them. Federal and state regulations further state that all employees of the District must be trained and qualified in specified Federal Emergency Management Agency (FEMA) courses depending on an employee’s emergency response responsibilities.

EMERGENCY OPERATIONS CENTER (EOC)

Each campus has an Emergency Operations Center (EOC) that can be activated during emergency situations. The EOC may be staffed by one or more key administrators, depending on the situation, and the EOC staff will direct the campus response to the emergency, coordinating with first responders for outside support. The Campus EOC’s will communicate directly with the District EOC and the District EOC will be responsible to update the County EOC of the status of our emergency and to coordinate with them with requests for outside support.
The EOC is composed of key administrators and their function is to coordinate emergency efforts including:

- Assess the overall disaster based on reports from area managers
- Initiate the emergency notification chain (call back of employees)
- Mobilize any additional staff to heavily damaged areas
- Determine the “All-Clear” when the disaster is over

All press releases will be prepared by the Director Communications and Publications. In absence of this person, the key administrator will designate an individual responsible for this function.

PREPAREDNESS

The District’s preparedness is based on pre-staged supplies, training and awareness, emergency drills, and support agreements with outside agencies. All employees of the District will receive training in responding to and managing emergency situations according to federal and state laws and regulations. The best response to emergency situations is preparedness.

EMERGENCY CHAIN OF COMMAND

All emergency situations should be notified to District Safety and Security who will make the notifications necessary to the key administrators. District Safety and Security is available 24-hours a day/seven days a week at 714 564 6330.
