## Task 2 – Handout 4

### Introduction: Applying for Health Insurance

Having health insurance in the United States is important because:

- it will protect you and your family from high medical bills and debt.
- it can help you and your family stay healthy.

If you don't have health insurance, there may be a low-cost or free clinic near your home. Look at the list of health care services on previous pages of this packet. Find the phone number of a clinic near your house and call to see if you can get help there. Sometimes you need to wait a few weeks for your first appointment because the clinics are busy.

**The best way to pay for health care is to have health insurance.**

You can apply through Covered California at [CoveredCA.com](http://CoveredCA.com)

Or call: 1-800-300-1506

Covered California is the place where individuals and families can get low-cost health insurance in California. With just one application, you'll find out if you qualify for free or low-cost health insurance.

#### Option 1: Medi-Cal Program

This is a state-run program for low-income individuals and families. If you qualify (your income is below a certain level), you will get free health insurance.

#### Option 2: Covered California

This is an online marketplace where you can buy private insurance. Financial help is available to many middle and lower income individuals.

**Income:** money that is earned from work  
 You may need to give information about your income to apply for health insurance.
