# How to Spot a Phish

## Finding the phish 101 with Professor Troy

## Lesson 1: Watch out for emotions

### Greed

Phishing emails often dangle a financial reward of some kind if you click a link or enter your login information. If an email offers you something that seems too good to be true, it probably is.

### Urgency

If an email provides a strict deadline for performing an action -- be suspicious. Phishing emails will try to fluster recipients by creating a sense of urgency.

### Curiosity

People are naturally curious, and phishers take advantage of this by sending emails that promise to show us something exciting or forbidden.

### Fear

Scaring recipients is a common tactic in phishing emails. Emails that threaten you with negative consequences or punishment should be treated with suspicion.

## Lesson 2: Examine these items closely

### Email Signatures

A signature block that is overly generic or doesn't follow company protocols could indicate that something is wrong.

Bob Jones
IT Manager
Acme, Inc.
(555) 555-5555

### Sender Address

If the address doesn't match the sender name, be suspicious of the entire email.

From: Bob Jones <e34grhgshfd @phishing-

### Email Tone

We know how our co-workers and friends talk, so if an email sounds strange, it's probably worth a second look.

Greetings Friend,

Please to click on link for

## Lesson 3: Beware of these elements

### Attachments

When an attachment comes from someone you don't know or if you weren't expecting the file, make sure it's legitmate before opening it.

From: Joe Smith
To: Troy Foster
Subject: WebMail Migration

Attachment -- Webmail_Migration.pdf

Troy,

This is to inform you that we are in the processing of migrate our email infrastructure to the Windows 2003 platform, which includes an e e-mail.

### Log-in Pages

Spear phishers will often forge login pages to look exactly like the real thing in order to steal your credentials.

Attached is a document outlining the benefits of th migration we request you to enter your Windows password before 8 PM on Tuesday. Failure to do so will result in being locked out of your email account!

Please click here to update your password.

### Links

Roll your mouse pointer over the link and see if what pops up matches what's in the email. If they don't match, don't click.

Thank You,
John Smith

### If you see something, say something!

Report suspected phishing emails to the information security team.
